Foreword

GAIN I would like to thank all my customers and friends for the many orders that I had from you. I certainly appreciate them and hope you have derived much enjoyment from them. More and more people are learning how easy it is to grow and enjoy the new varieties of gladiolus now that thrips are so easily controlled and the colors and growth of the varieties improved.

To new customers I wish to state that I feel that my list of varieties contains most of the finest varieties obtainable, and I would like to have you try our bulbs and see the wonderful results you will have.

This year I have added a considerable number of new varieties which I have grown over the past year or two and feel they are definitely superior varieties that you should certainly grow.

The growing season this year was the best I have had for a number of years and the spikes were out of this world. I attended four shows this year, Binghamton, Toledo, Michigan and Southeastern Michigan and although most of our bloom came in time for but two of these we did quite well with winners. Our ribbons at these shows totaled 70 blues, Grand Champion, Reserve Champion, 2nd day Champion, 2 Recent Introduction Champions, 4 Section Champions, 4 Size Champions and 2 Specials. Our own introductions accounted for 25 Blues, and Chief Pontiac took 1 size Champion, Best Recent Introduction, Reserve Champion, and largest floret 7". Lancelot only showing at 3 of the shows had 4 Blues and 1 Section Champion. The Grand Champion was with Cotillion which we cut the evening before the show and it had 10 blooms open in perfect shape at show time. This also won best Recent, and Section Champion. Others winning Section Champions were Venida, Bo-Peep and Spitfire. These glads were not grown under any special methods but were cut right out of the field and were not held under artificially cold conditions. Good bulbs of good varieties need only good garden soil plus moisture to produce winners.

The growing and selling of "The finest Bulbs of the Finest Varieties" is our only business and we will do our utmost to please you at all times.

Thank you,

G. V. SNYDER.

. . . TERMS . . .

All orders must be accompanied by cash in full, or 25% deposit will hold orders of \$5.00 or more for April delivery, balance to be sent before delivery, or will send C. O. D.

Orders of \$2.50 or more from retail are prepaid to all points in U. S. A. We will accept orders of not less than \$2.00 if postage is included. Orders of \$5.00 or over prepaid to Canada. No single items less than 25c. We do not accept stamps.

If your order contains both wholesale and retail items, unless you give instructions to the contrary we will ship them together F.O.B. and include enough extra count or extras to more than offset the carrying charges on the retail items.

GUARANTEE

We guarantee all bulbs and bulblets purchased from us to be true to name, full size, and free of disease and insects upon receipt. We will replace stock or refund purchase price, on any bulbs or bulblets purchased from us, that do not meet above guarantee, that are returned to us within two weeks. We do not guarantee bulblets to grow, nor the crop you harvest, as soil diseases, dips, sprays, etc., used, puts this beyond our control.

Our bulbs are state certified, inspected in field and storage.

SIZE OF BULBS

Large Bulbs are 1¼" in diameter or more, and give the largest spikes.

Medium Bulbs are ¾" to 1¼" in diameter. These bloom excellently, often as well as large, but somewhat later.

Small Bulbs average ½" in diameter and often bloom, but with smaller spike.

Bulblets — The little hard shelled cormlets from which bulbs are grown.

THIS LIST SUPERCEDES ALL PREVIOUS PRICE LISTS

Special Premium Bulbs For Early Orders

1950 Introductions

from Andy Maier
(Introducers Description)

BRIGHT EYES (Maier) A grand new ruffled yellow with rose throat spots that look straight at you, and really add to the life of the flower. Grows 56 inches tall, with a 28-inch flowerhead on a tall straight spike that carries 20 to 22 buds, opening 6 easily with 8 in color.

Winner American Home Achievement Medal 1949

Priced: Any size bulb, \$5.00. 10 bulblets for \$5.00 with each bulb purchase.

from Ward Flower Ranch
(Owners Description)

NINETY GRAND (Zimmer) A deep, salmon, sometimes verging into the orange red class, 436. Though the color varies, it's dependability as an all round commercial never changes; or its popularity with the florists for its adaptability in use. Has formal placement, nineteen to twenty-one buds, ten open with almost all showing long fingers of color so that the entire spike appears to be in bloom. Is an eighty to eighty-five day glad. Tall, straight grower; easy cutter, excellent shipper; Florida tested and disease resistant there, good germinator. In fact, everything you can ask for, in a good healthy commercial. Color picture available for inspection ON LOAN.

Flash . . . Lancelot scores high again. !!

Rhode Island Trial grounds Commendation Award. Score 82½. Report states weather conditions very bad with exceedingly high temperatures and drought, and that any glad which scored 80 this year is exceptionally fine and under normal conditions would be outstanding.

This rating combined with the trials of the previous 2 years in the N. A. G. C. Gardens with high rating and the N. E. G. S. 4 trial gardens where it received an Award of Commendation with an average of 82.4 in all 4 gardens, there being only 1 other variety receiving this award. With this record in trial gardens from coast to coast we feel this should be a topnotch variety for any use and grow good under all conditions.

General List

Our general list is divided into different sections this year to enable you to more easily make your selections. The first list contains with few exceptions late introductions. The Standard list following this, are the standard priced varieties. These are very excellent varieties and are priced lower only due to larger stocks. Following this are the new Australian varieties.

Regarding Blooming Dates

Every year we have customers write regarding blooming dates of their glads. We have attempted to give you this, following the name of each variety. However, these dates are only approximate and cannot be determined exactly as weather conditions have a lot to do with them. Cold late spring weather will hold back some and they will not bloom as early as some planted later after the ground has warmed thoroughly and continues warm thereafter. We have had glads that, planted in the first part of May, would normally bloom in 70 days, but planted later in moist warm ground with excellent growing conditions bloomed in 53 days. Hence we try to give you the date for normal weather. Varieties marked Early normally bloom in 70 to 75 days; Early Mid-Season, 75 to 80 days; Mid-Season, 85 to 90 days; Late Mid-Season, 90 to 100 days, and Late, over 100 days.

Remember

Early orders always get the "Cream of the Crop" and you are sure to get the varieties and size you want. We always run out of some varieties and sizes later on, so order early and be sure.

Standard Varieties

The following standard varieties are being grouped this year at one standard price, to enable our customers to more easily make their selections from these without looking up prices separately. Those listed below are priced as follows:

Lg. 3—30c (10—80c), Med. 3—20c (10—50c), Blts. 25c pkg.

Varieties with asterisk available only in large size bulbs. 5 or more bulbs at the 10 price.

- * **ALGONQUIN** (Palmer) (Early) (536) Tall glowing scarlet, wide open blooms, ruffled and needlepointed. 8 to 10 open. Finest scarlet.
- * **AMERICAN COMMANDER** (New) (Mid-Season) (552) Beautiful blood red. Tall straight stems and very strong grower. Opens 6 to 7 lightly waved blooms on long flower head. Finest red.
- * **CORONA** (Palmer) (Mid-Season) (560) Creamy white shading more creamy toward the throat with a rose picotee edge on all petals. Opens 6 to 8 wide open blooms on a tall strong plant. A wonderful cut flower and great prize winner.

ELIZABETH THE QUEEN (White) (Mid-Season) (566) Beautiful clear lavender mauve with darker lines in the throat. 7 to 8 large beautifully ruffled blooms open at one time.

- * **HIGH FINANCE** (Wilson) (Late Mid-Season) (580) Smoky, light violet orange, cream throat, slightly ruffled. Tall with very long flowerhead and 8 to 9 open. Very strong grower and a fine commercial.

- * **JEANIE** (Pruitt) (Mid-Season) (440) Bright glistening rose pink, with white raised mid-ribs to cream throat. 5-inch florets on tall strong stem. Very fine new one.

KING CLICK (Wilson) (Mid-Season) (552) Big ruffled ex. red self. Nine 5½" florets open on a tall strong spike of 21 buds. Fine propagator. Champion many times.

LEADING LADY (Johnston) (Mid-Season) (506) Creamy white Sport of Picardy. This is no doubt one of the finest glads grown. It will win on the show table and is a grand commercial. Don't miss it.

- * **MAGNOLIA** (Palmer) (Mid-Season) (460) Smooth, soft, light creamy rose. Color near that of Rima. Has 6 to 8 large heavy textured blooms open on a tall straight spike. Fine propagator and wonderful cut flower. Don't miss this.

- * **OHIO NONPAREIL** (Wilson) (Mid-Season) (550) Very tall large scarlet red. 6½" floret, 9 open on long flowerhead. Winner of many championships.

OGARITA (Wilson) (Mid-Season) (532) Rose salmon shading to a golden throat. Very strong plants that grow very tall. Blooms are slightly fluted and open 8 on long flowerhead. Very fine show or commercial.

SNOW PRINCESS (Pfitzer) (Early) (400) A taller, larger flowered Maid of Orleans. Fine healthy grower and good propagator. Fast becoming the leading commercial white.

The following varieties are uniformly priced at

Lg. 2—25c (10—\$1.00), Med. 3—25c (10—70c), Sm. 4—25c (10—60c), Blts. 30c pkg.
5 or more bulbs at the 10 price

BURMA (Palmer) (Mid-Season) (562) Beautiful deep rose, lighter to throat. Up to 10 heavily ruffled, perfectly placed blooms on a tall straight spike. Very rich color.

CHERRY JAM (Zimmer-Graff) (Early Mid-Season) (543) Ruffled deep salmon pink with a cherry blotch on lower petal. A very nice blotched variety with a good number open.

COVER GIRL (La-Salle) (Late Mid-Season) (542) Large flowered medium pink. Opening 10 to 12 florets at one time, very tall spikes. This will win on any show table.

CRINKLE CREAM (Ellis) (Early Mid-Season) (410) A very beautiful large ruffled clear light yellow. It makes tall sturdy spikes that are always straight with blooms well placed and strongly attached. We cut many hundred dozens for the florists and they asked for more.

FIREBRAND (Butt) (Mid-Season) (452) Slightly ruffled, deep signal red, throat slightly deeper with white lines on lower petals. 8 or more blooms open on tall straight spikes. Quite outstanding.

GRENADIER (Palmer) (Mid-Season) (416) A new and distinctive shade of light orange buff. Makes fine spikes and opens 6 to 8 blooms at once.

SPOTLIGHT (Palmer) (Early Mid-Season) (413) Clear medium deep yellow with small scarlet blotch. Makes fine tall spikes with 6 to 7 large, lightly waved blooms on fine flowerheads. Very striking and beautiful.

TITAN (Palmer) (Mid-Season) (432) Wonderful, immense deep brilliant salmon. 8 very large heavily ruffled blooms open on fine tall spikes. A real exhibition variety and fine cut flower.

Australian Varieties

This year we have grouped together under one heading all Australian and New Zealand varieties. With a few exceptions these are all 1946 to 1949 U.S.A. releases. Stocks of some are very small and first orders will probably deplete stock, so order early if these are wanted.

ALL GLORY (Toon N. Z.) (Early) (423) Tangerine orange with a deeper rosy red blotch. Very striking and attractive. Opens to 9 large beautifully ruffled florets at a time, on tall straight spikes. Med. 35c, Sm. 20c, Blts. 3-20c (10-50c) (No Discount)

D. BOTH'S MEMORY (Both) (Mid-Season) (506) Huge ruffled cream. The buds have a greenish cast which disappears after opening. Opens 6 on tall spikes. Lg. 80c, Blts. (10-80c) (No Discount)

GIANT CYCLAMEN (Higgins) This variety classed as cyclamen pink in Australia. We would call it a rose lavender or medium deep rose. Makes fine spikes even from small bulbs. Lg. 80c (10-\$6.40), Med. 60c (10-\$4.80), Sm. 40c (10-\$3.20), Blts. 2-20c (10-75c)

KAWATIRI (Pupich N. Z.) (516) A beautiful rich creamy buff, shading to barium yellow throat, petal edges lightly diffused pink, opens to 9 large, lightly ruffled, heavy textured florets on tall spikes. One of the best from down under. Lg. 80c, Med. 60c, Sm. 40c, Blts. 2-20c (10-75c) (No Discount)

MAURRIE TREVAN (Both) (Mid-Season) (454) Beautiful clean velvety black red. This new glad from Australia looks like the best black red to date. Makes strong tall spikes with many open blooms. Lg. \$1.50 (10-\$12.00), Med. \$1.00 (10-\$8.00), Sm. 75c (10-\$6.00) Blts. 2-30c (10-\$1.20), (100-\$9.50)

MRS. E. BOTH (Both) (Early Mid-Season) (530) A beautiful blend of clear, light orange pink, with a harmonizing blending to clear deep cream throat. The florets which are round and wide open, grow 6" to 7½" in diameter on flowerheads from 30" up, with 24-26 buds. Opens 9 to 12. Can be tremendous if given extra water and fertilizer when bud spike starts out. Is at its best only from large bulbs. Lg. \$1.00 (10-\$8.00), Med. 75c (10-\$6.00), Sm. 50c (10-\$4.00), Blts. 2-20c (10-80c)

MRS. R. G. ERREY (Errey) (454) A very rich velvety black red self. Has a glowing sheen. Opens to 10 blooms of 6" diameter on flowerheads to 25 buds. Looks like one of the best black reds. Lg. 80c, Med. 60c, Sm. 40c, Blts. 3-25c (10-70c)

STRATHNAVER (Peattie) (Mid-Season) (500) Exceedingly large husky growing pure white. Makes very huge blooms of 7" or more with 8 to 10 open at once. Due to large size of florets should not be left out in wind, after first bloom opens, as attachment is slightly weak for its size. A wonderful show glad. Lg. 75c, Med. 55c, Sm. 40c, Blts. 2-15c (10-50c)

SUNKIST (Errey) (423) Beautiful glowing apricot pink, with rich cream lower petals, lightly powdered apricot in throat. Opens 12 lightly ruffled perfectly placed blooms on tall spikes. Australia reports outstanding. Lg. 75c (10-\$6.00), Med. 50c (10-\$4.00), Sm. 35c (10-\$2.80) Blts. 3-25c (10-70c) (100-\$5.50)

TUNIA'S MAHOMET (Both) (Early Mid-Season) (580) A beautiful distinctive smoky, very deep velvety smoky plum rose with orange scarlet in throat. This variety not only has color value but makes stunning spikes with 8" florets of which 8 will open at once on a long flowerhead. Lg. 20c (10-\$1.60), Med. 15c (10-\$1.20), Sm. 2-20c (10-80c) Blts. 25-20c (100-50c)

How to Grow Gladiolus

Gladiolus are one of the easiest flowers to grow. Ordinarily good gardening practices will reward you with fine blooms. The newer varieties are a far cry from the old gladiolus that your Dad and Mother grew. The thrips that many times kept glads from blooming have been licked by D.D.T. and with little effort you can have a gorgeous garden of glads. The following cultural hints should be found helpful.

WHEN RECEIVED. Open package at once to admit air. Store in a dry, cool cellar.

WHEN TO PLANT. Plant when the trees native to your locality are leafing out. Here in Michigan I start planting the first week in May, and finish up about the 20th of June. For maximum results plant some time in May. Do not plant too early.

WHERE TO PLANT. The ideal place to plant is a garden full of sun, where there are no trees, shrubs or anything to take the moisture from the ground. If planted in beds or in the borders, be careful not to plant them too close to strong growing plants.

KIND OF SOIL. Glads will grow in most any kind of soil from light sand to heavy clay, but a sandy loam is the best. Be sure there is good drainage. Glads like lots of water, but will not stand wet feet. They do not like lime.

DISINFECTING. We advocate disinfecting bulbs before planting even though they appear free of insects and disease. An easy inexpensive dip which is as effective as any known today is Lysol. Soaking bulbs in a weak solution of Lysol (4 teaspoons to 1 gallon of water) for 3 hours has been found effective against thrips and bulb diseases. **Caution:** Bulbs must be planted immediately after soaking and soil must be moist. If not possible to plant immediately rinse bulbs thoroughly in clear water to remove Lysol and lay out to dry. When again ready to plant dip in solution again for one minute and plant immediately.

PREPARATION OF SOIL. Unless your soil is very good it is a good plan to manure it well in the fall using cow or hog manure, plowing it under in the fall. Do not use hen or horse manure unless thoroughly decomposed. Pulverize the soil well before planting to a depth of 6 inches preferably. Use no manures of any kind in the spring unless thoroughly decomposed.

DISTANCE APART. You may plant bulbs 2 or 3 inches apart and 2 bulbs wide in row if you desire, 3 or 4 inches apart for better results.

DEPTH TO PLANT. Plant from 3 to 6 inches deep. Sandy soil requires deeper planting than clay soils. Small bulbs should not be over 3 inches deep.

HOW TO PLANT. Place the bulbs in the trench and cover with soil. Some people sprinkle a light application of commercial fertilizer on the partly covered row before leveling off.

CULTIVATING. Work the ground well all summer. Loosen it well after heavy rains and keep a good dust mulch during dry weather. Cultivate shallowly when the roots begin to spread.

CUTTING. The gladiolus is essentially a cut flower. Leave as many leaves as possible; at least 4 or 5. Cut on the slant and when the first flower is beginning to open. Your bulbs will mature better if the flowers are cut.

WATERING. During hot dry spells a thorough watering once a week will give gratifying results. Watering just before blooming will give better flowers. Cultivate soil as soon as possible after watering.

FERTILIZING. Glads do not require lots of fertilizer though they will respond gratefully to moderate applications during the growing season. A handful to about 15 feet of row and worked in the soil well is enough. Two or three light applications before blooming is enough. Before rains is the best time, otherwise water well after fertilizing. Any commercial fertilizer is recommended. Fertilizers richer in Potash and Phosphoric Acid than in Nitrogen are recommended. **Do not let the fertilizer touch the plants or roots.**

SPRAYING. Thrips are the gladiolus' worst enemy. The thrip is a small black insect about the size of a pencil mark and one-sixteenth inch long. The immature are small and yellowish. They cause small silvery patches on the foliage and flowers. If they are bad the buds do not open, turning to a dull brown. The first preventive against the thrip is to disinfect the bulbs as mentioned above, before planting. If the thrips still persist, spraying or dusting must be done. The new dusts and sprays containing 5% D.D.T. obtainable wherever general dust and spray materials are sold are most effective. Dust or spray containing other materials in conjunction with the D.D.T. (such as rotenone, derris, etc.) are as good or better than only D.D.T., but be sure they have at least 5% D.D.T. Dusting when plants are about 1 foot high and continuing at two week intervals or after rain will guarantee perfect blooms.

DIGGING. Don't leave part of stem on bulb. Cut as close to bulb as possible. Do not pile too deep in your box. Dry the bulb as quickly as possible thus preventing diseases. Do not leave the old bulbs and roots on all winter as these harbor diseases. Clean bulbs as soon as old bulb separates easily. This is usually about three weeks. Dusting bulbs immediately after digging with a light application of 5% D.D.T. dust, and another light application after cleaning and before storing will assure you of thrip free bulbs until planting time. One or two thrips brought in on your bulbs, if allowed to overwinter on them can, with their offspring, take most of the life out of the bulb.

STORING. Keep in as cool and dry a place as possible, free from frost.

- 90 Any other color.

For example, the classification number of Algonquin is 536. The 500 means that its floret size is 5½ inches or larger and the 36 indicates it is a scarlet. Hence the numbers in parenthesis listed right after the variety name tell the size and color of the individual floret as grown from large bulbs.
